If you are interested in this game, please visit our website at Or go to the store where you bought this game 4/5 Fantasy action RPGs are not exactly my personal thing so I can't say I am all too familiar with its history. However, I understand that the dev had intended to create a living world where you can interact with others as you travel around. That's the story I'm going to proceed with. Note: This game is very different from other dungeon crawler RPGs like DMM. Because the game was developed as a single-player RPG, it was designed so that people can meet others in the game. Game Info Developer: Saizou Publisher: Nintendo Platform: Nintendo Switch Genre: Fantasy Action RPG Released: November 2, 2019 Distributed by: NIS America Price: \$29.99 / 9,160 yen About This Game RPGs are, in general, stories about what makes a person fall in love with his or her circumstances. They are about accepting one's own problems and proceeding with the challenges they cause, and it's certainly understandable that the main message of that kind of story is to tell us the importance of our own existence. However, the games of the genre are mostly focused on the "set of challenges" aspect of the story. They have a clear plot in which the protagonist goes to different locations and battles different enemies, accumulating experience as he does so. They tell the story of the gradual growth of the protagonist's abilities and capabilities from the first battle to the very end, so we are set on the right foot for the start of the adventure. Inevitably, characters who spend their time doing nothing but fighting one enemy after the next, or accumulating equipment, sound pretty flat and uninteresting to me. When I pick a game of this type up, I usually get into it and end up thinking, "This is already old news." What is the point of playing a game like this? However, now I am hearing bff6bb2d33
